PROFILE

Final-year Computer Science undergraduate who has built and deployed ML systems across NLP, deep learning, and predictive analytics. Led a team at Infosys building Power BI dashboards on large-scale election data, deployed an NLP chatbot at AICTE, and independently developed a stacked LSTM model for stock price forecasting and a sentiment pipeline across 80K+ reviews. Experienced across the full ML lifecycle — data preprocessing, model training, evaluation, and visualization.

EDUCATION

United University

Bachelor of Technology in Computer Science and Engineering

Prayagraj, India

Sep. 2023 – Jun. 2027 (Expected)

Sri Chaitanya Vidya Niketan

Intermediate

Visakhapatnam, India

2022

Y.M.C.A Centenary School & College

High School

Prayagraj, India

2020

EXPERIENCE

Infosys

Data Visualization Intern

Remote

Sep. 2025 – Nov. 2025

- Led a 4-member intern team to design and deliver 3 interactive Power BI dashboards analyzing Indian General Election datasets, completing the project 2 weeks ahead of schedule.
- Performed data cleaning, transformation, and EDA on large datasets, reducing manual reporting effort by an estimated 40%.
- Coordinated task distribution and review cycles across the team, ensuring consistent dashboard quality and on-time delivery.

AICTE

AI & Cloud Intern

Remote

Jul. 2025 – Aug. 2025

- Built an AI chatbot using IBM Watson Assistant and IBM Cloud for automated user interaction.
- Applied NLP techniques for intent detection and response classification.
- Designed conversational workflows and deployed scalable cloud-based AI solutions.

PROJECTS

Stock Price Prediction using LSTM | *PyTorch, Python, Scikit-learn, Pandas* | [GitHub](#)

Apr. 2026

- Built an end-to-end Deep Learning pipeline to predict Amazon (AMZN) next-day closing prices using a stacked 2-layer LSTM network with 200K trainable parameters in PyTorch.
- Implemented BatchNorm, Dropout (0.2), early stopping, and an 80/20 train-test split on 9 years of historical data (2,266 trading days).
- Evaluated on 313 unseen test-set trading days achieving 14.54% MAPE; generated 30-day future price forecasts with full residual and loss curve analysis.

Sentiment Analysis – Amazon Reviews (80k+) | *Python, Scikit-learn, NLP, TF-IDF* | [GitHub](#)

Jul. 2025

- Developed an end-to-end ML pipeline to classify sentiment across 80,000+ product reviews into Positive, Neutral, and Negative categories.
- Applied text preprocessing, TF-IDF feature extraction, and compared multiple ML models for optimal performance.
- Achieved 87% F1-score after hyperparameter tuning and model optimization.

Chat Cleaner – NLP Chat Classification System | *Python, Sentence-BERT, Hugging Face* | [GitHub](#)

Jan. 2025

- Built an NLP-based chat classification tool using Sentence-BERT embeddings to analyze and filter live chat messages.
- Reduced duplicate messages by 70% using semantic similarity detection.

- Integrated toxicity detection models filtering 95%+ irrelevant content in real time.

Customer Churn Prediction & Retention Analysis | *Python, Scikit-learn, SQL, Power BI* | [GitHub](#) Nov. 2025

- Built a churn prediction system on telecom datasets using feature engineering, EDA, and classification models.
- Implemented Logistic Regression and Random Forest achieving 85%+ accuracy.
- Visualized churn drivers and retention insights using Power BI dashboards.

TECHNICAL SKILLS

Programming: Python, SQL, Data Structures & Algorithms

Mathematics: Probability, Statistics, Linear Algebra

Machine Learning: Scikit-learn, PyTorch, LSTM, Supervised Learning, Model Evaluation, Hyperparameter Tuning, Early Stopping

NLP: TF-IDF, Sentence-BERT, Hugging Face, Intent Detection, Text Classification

Data Analysis: Pandas, NumPy, EDA, Statistical Analysis, Data Cleaning

Data Visualization: Power BI, Tableau, Matplotlib

Databases: MySQL

Cloud Platforms: IBM Cloud, AWS, Oracle Cloud

Tools: Git, GitHub, VS Code

CERTIFICATES

Oracle Cloud Infrastructure 2025 – AI Foundations Associate | Data Science – Infosys | Data Analytics using Power BI – Infosys

Data Visualization Job Simulation – TATA (Forage) | Data Analytics Job Simulation – Deloitte (Forage)

EXTRACURRICULAR ACTIVITIES

GeeksforGeeks

Campus Ambassador

Jan. 2026 – Present

- Represented GeeksforGeeks as Campus Ambassador, promoting technical content and events.

United University

Organiser, Tech Team – HackDiwas 3.0

Apr. 2026

- Organised and managed all tech-related operations for HackDiwas 3.0, a two-day software and hardware hackathon at United University, Prayagraj.
- Served as a technical judge alongside faculty, evaluating team submissions on code quality, problem-solving approach, and implementation feasibility.

United University

Co-Organized HackDiwas 2.0

Apr. 2025 – May 2025

- Co-organized HackDiwas 2.0, managing event logistics, participant coordination, and hackathon execution.
